Professional Summary

Principal software engineer and technical leader with 15+ years of experience building scalable distributed systems across enterprise software, cloud platforms, e-commerce, and AI products. Expertise in enterprise AI agents, semantic data access, federated query systems, natural-language-to-SQL, technical strategy, and cross-functional execution.

Core Skills

Languages: Java, TypeScript, Python, C++ **Cloud/Systems:** AWS, Microservices, Distributed Systems, Low-Latency Systems

AI/Data: LLMs, RAG, NL-to-SQL, LangGraph, PyTorch, TensorFlow, scikit-learn, Data Fabric, Federated Query Engines, Semantic Models

Leadership: Technical Strategy, Architecture Reviews, Cross-Functional Leadership, Mentorship

Professional Experience

UiPath

Sep 2025–Present

Principal Software Engineer

Bengaluru

- Architected and delivered UiPath Data Fabric integration with the Agents Unified Runtime, enabling enterprise AI agents to discover, read, and update governed business entities across the platform SDK, LangGraph runtime, and orchestration framework.
- Defined federated enterprise data access as a native agent capability without data replication, achieving 72% end-to-end NL-to-SQL execution accuracy at 2-second P95 inference latency.
- Established semantic contracts for entity relationships, choice sets, and read/write operations; shaped strategy for schema grounding, entity grain, query planning, telemetry, and production readiness across multiple teams.

Microsoft

Sep 2021–Aug 2025

Lead Software Development Engineer

Bengaluru

- Architected and delivered an Excel Formula Remediation Engine affecting 12,000 tenants and 2.3 million files monthly; led eight engineers through implementation and production rollout.
- Led a five-member team improving Excel Online reliability and parity with Excel Desktop within the calculation stack.
- Built a GenAI-based test-generation workflow grounded in the Excel calculation engine, raising remediation accuracy to 99.9%; also moderated the Excel IDC Design Review Panel.

Amazon

Feb 2020–Aug 2021

Senior Software Development Engineer

Bengaluru

- Led seller-verification capabilities across Amazon and AWS storefronts and developed a business process management platform on AWS Step Functions.
- Provided architecture guidance through the Samurai group on web components, data-intensive applications, and AWS service-development practices.

Amazon Web Services

Apr 2015–Feb 2020

Software Development Engineer II

Seattle

- Core engineer for AWS Marketplace across the platform pipeline, including federated frontend architecture and developer tooling.
- Bootstrapped an experimentation platform and implemented a recognition-token service at 10 ms P95 latency.
- Led container-product support for the AWS re:Invent 2018 launch and built tooling for AWS service

onboarding to Marketplace.

Amazon Webstore

Sep 2011–Apr 2015

Software Development Engineer

Hyderabad

- Architected a site-design platform using independently deployable web components and defined theme-design integration with seller tools.
- Built seller inventory auto-categorization and distributed tracing tooling to improve reliability across integration points.

Deloitte India Consulting Pvt. Ltd.

Jun 2010–Sep 2011

Business Technology Analyst

Hyderabad

- Developed information-management and data-visualization proofs of concept using the Google Maps API.

Education

University of Texas at Austin

2022–2025

Master of Science in Computer Science Relevant coursework: Optimization, Machine Learning, NLP, Reinforcement Learning, and Deep Learning. Project: time-series forecasting of weighted average prices for market makers.

Vellore Institute of Technology

2006–2010

Bachelor of Technology in Computer Science and Engineering

India CGPA: 8.87/10.

Additional Experience

Generative AI Consultant, Auxil: Advised the startup on moving from rule engines to GenAI workflows for COGS optimization, including architecture and implementation strategy.

Speaker, UiPath DevCon 2026, Bengaluru: Presented *Agents Integration with Data Fabric*, covering how enterprise AI agents use governed business entities for reliable read and write operations.

Speaker: Developing Services on Native AWS: Presented tooling, architecture patterns, and practices for building microservices on AWS.

Interests

Angel investing; endurance cycling and randonneuring.
